Variolink® Veneer

ESTHETIC RESIN CEMENT

ivoclar vivadent®
passion vision innovation

Value Shading

Variolink Veneer offers seven light cure value shades to enhance the esthetics of the final restoration. The Medium Value (MV 0) is very translucent and has little effect on the final restoration. The High Values allow the clinician to brighten or increase the value and the Low Values provide a "warming" effect to the final restoration.

Variolink Veneer Light Cure

All Variolink Veneer are amine-reduced providing a high degree of color stability ensuring outstanding esthetics.

Variolink® Veneer

EXTRAORDINARY CLEAN UP

Clean Up

Variolink Veneer offers the clinician a fast, easy solution to clean up excess cement during the adhesive bonding procedure. No more grinding, burs, or tedious clean up required. Simply load the restorations, seat, cure, and peel away the excess. Variolink Veneer provides the unique combination of the security of adhesive bonding and the easy clean up of a conventional cement.

Physical Properties

Variolink Veneer's microfill chemistry provides key benefits including low wear rates, high translucency, high polishability and strong bonds. Variolink Veneer demonstrates significantly lower wear values compared to competitive resin cements currently on the market ensuring the long term clinical success of your esthetic restorations.
