Strong

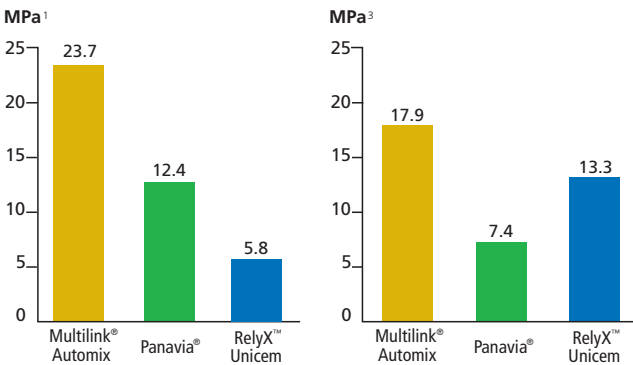

Multilink Automix features patented, hydrolytically stable acidic monomers generating high immediate bond strengths and durable adhesion for long-term security. Within 10 minutes, Multilink Automix establishes a reliable and long-lasting bond to a large variety of restorative materials.

Shear Bond Strength Test Results

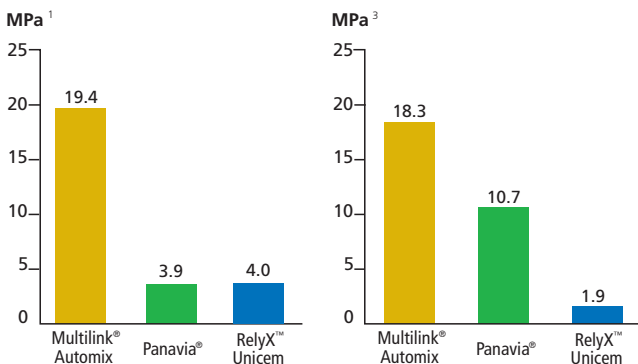

All-ceramic to Dentin (Immediate)

Zirconia to Dentin (Immediate)

Metal-based to Dentin[†]

Universal

Multilink Automix is a truly multi-purpose adhesive cement, indicated for cementation of indirect restorations (inlays, onlays, crowns, bridges, and posts) made of all types of restorative materials including:

Metal and Metal-Ceramic Restorations requiring fast and reliable self curing (chemical curing)

IPS InLine®/IPS InLine® PoM

Oxide Ceramics and Fiber-Reinforced Composite Restorations requiring dual-curing initiators due to restricted or hampered access to light (e.g. Zirconium)

IPS e.max® ZirCAD/Ceram

FRC Postec Plus®

All-Ceramic Restorations requiring high-immediate bond strength, good marginal adaptation and effective sealing of the dentin.

IPS Empress®/IPS e.max®

Precious Alloy Restorations requiring long-term reliable results.

Brite Gold® XH

Applied per manufacturer's instructions; Light-cured with high output quartz halogen curing light (>1,000 mW/cm²); Full report available upon request

¹Ivoclar Vivadent Applied Testing Center Amherst, NY, February 2005

²James Simon, DDS, Med Waldemar deRijk, DDS, Ph.D. Director of Esthetic Dentistry and Clinical Research University of Tennessee, February 2005

³Dr. Carlos Munoz Chairman of Restorative Dentistry University at Buffalo, February 2005

[†]10 minute bond strength results; self-cure.

Multilink Automix is a trademark of Ivoclar Vivadent, Panavia is a trademark of Kuraray Co. Ltd and RelyX Unicem is a trademark of 3M ESPE.

Fast, Easy Application

Multilink Automix is a universal adhesive resin cement designed for fast, easy application.

One-Step Primer

A quick 15 second application of the self-etching, self-curing Multilink Primer seals the dentin, provides good marginal adaptation and high immediate bond strength.

Automix Delivery

- Exact dosing with less waste (Dispense only the amount of material required)
- Consistent mix every time
- No hand mixing
- No activation of capsules
- No additional application tools or devices

NEW Easy Clean-up Formulation

Multilink Automix is now available in a new "Easy Clean-up" formula for situations where pre-curing excess cement is preferred.

The new "Easy Clean-up" formulation allows excess material to be light-cured for 1-2 seconds per quarter surface (mesio-oral, disto-oral, mesio-buccal, disto-buccal) transforming the material to a gel-like consistency for fast, easy removal.

Successful

Multilink Automix is clinically proven by various clinical studies*. The simplified procedure of Multilink Automix in combination with a proven chemistry provides high bond strength values, good marginal adaptation and minimal post-operative sensitivity.

Delivery Forms

System Packs

Contents:

- 1 – Multilink Automix syringe (9g)
- 1 – Primer A (3g)
- 1 – Primer B (3g)
- 1 – Multilink Primer mixing well
- 1 – Monobond Plus (5g)
- 1 – OptraStick test pack
- 15 – Automix mixing tips
- Various accessories

Multilink Automix “Easy Clean-up” System Pack

- 627471 – Transparent
- 627473 – Yellow
- 627472 – White Opaque

Refills

Contents:

- 1 – Multilink Automix syringe (9g)
- 15 – Automix mixing tips

Multilink Automix “Easy Clean-up” Refill

- 615216 – Transparent
- 615217 – Yellow
- 615218 – White Opaque

- 576825 Multilink Primer A/B Refill, (2 x 3g)
- 613626 Multilink Primer A Refill (3g)
- 613627 Multilink Primer B Refill (3g)

Shades

Multilink Automix is available in 3 shades to meet the clinical indication and esthetic demands.

White Opaque Yellow Transparent

- 626221 Monobond Plus (5g)
- 592225 Multilink Automix Mixing Tip Refill (15/pk)
- 603018 Multilink Root Canal Tip Refill (5/pk)
- 592435 Multilink Applicator Brush Refill (50/pk)
- 612600 OptraStick Refill (50/pk)
